Rifles: your rifle should be equipped with a weather proof scope and dialed in 2” high at 100 yards. Synthetic stocks perform best in the inclimate weather.

Recommended Calibers:

.338 Winchester mag - 250 grain minimum
.375 H&H mag - preferred caliber – 270 or 300 grain bullets
.416 Rem Mag – 350 or 400 grain bullets

Bullets – No Solids for Bears!!! Barnes X; Swift A-Frame; Woodleigh; Noster Partition or similar controlled expansion bullets work well on the big bruins.

It is strongly recommended that you purchase a changeable airline ticket as the weather is unpredictable on the Alaska Peninsula.

Received by _____ (client signature) Date:

To be returned to Mountain Monarchs of Alaska with the Hunter Information Form.
